

This version(V2.5) adds a function which the vedio_recorder time(year-mounth-date hour:minute:second)will be recorded in the recorded files,and will be shown when playback. please setting the time correctly as follow:

1> edit a .TXT file,as:

Show Time:Y

2008-05-18 10:08:28

the first row chooses show record time or not, if you do not want to show the record time, pls keyin :N

the second row is the current time, check carefully and make the correct format.

2> name the txt file as userconfig.txt

3> insert the recorder-pen to your computer, copy userconfig.txt to the root of the U_DISK of the pen.

4> remove the pen from your computer, power off the pen, then power on, now the time will be setting.

5> when complete, the time will be save forever.
